The project would involve rebuilding the basement stairs, new flooring throughout, adding a bathroom, and creating a family room from the existing garage and laundry area. Construction of the new family room will involve removing a section of concrete slab to level the floor with the garage, removing a bearing wall separating the garage from the laundry area, and buiding an exterior wall were there is now a garage door. We will be doing electrical work adding outlets, plumbing work in the bathroom, but the mechanical systems of the house will be unchanged. Existing parking pad in rear.
